# 1 ship is sexual erotic enjoying with its living tissue

first text

<https://archive.org/strea>

ship hull material made  
of living plants the  
cannabis, psilocybin  
mushroom microalgae ship  
is sexual erotic enjoying

with its living tissue it can  
give and receive sensual  
pleasure it has possibilities  
to increase its blood flow  
into certain areas where it  
is open too to body fluids  
from humans animals  
plants compost as well as  
blood and semen and  
vaginal ejaculations dna  
exchange via sexual  
intercourse but also trough  
caressing, stroking---  
fertility rite humans putting  
penis into mother earth ----  
fieldship personality grows

with its emotional, sexual,  
mental exchanges with  
both its inhabitants and via  
internet withalso lifeships  
can come together,  
exchange dna, enjoy in  
sexual intercourseship has  
nervous system similar to  
animals and humans two  
ships can become one  
physical, reshape them  
from dna exchange, via  
internet mentally but also  
via whole body sexual  
intercourse-----

-----

the evolution of mary the  
lifeshipperma and mary  
with maima shared the  
admiration of mother  
natures mechanisms and  
workings, biological  
sexuality and reproduction.  
if humans would want.... or  
ascende's thought ...if i  
want to transcend into a  
being what has no need for  
killing eating plants... if i  
want to become  
independent from mother  
earth... i better start  
enjoying eating more for in

the joy there lies the  
answer to hungerhunger  
ceases in times of  
marrymentperma, maima,  
mary were joining in with  
their thoughts, mary: i feel  
too a sympathetic wave  
rising within me towards  
the goal of man- and  
womankind come full circle  
with the killing. and myself i  
could greatly profit from  
you perma and the animals  
what live within me...  
\$when your digestion  
would be mainly fine tuned

smell, taste, hear, see,  
touch if you would live more  
from the aetheric energies  
like i use to power my  
antigravity propulsion  
drive...then my interaction  
with you could come to  
another level...ascende:  
you say if i, perma and the  
animals what live inside  
you, we eat less, but  
experience more, nourish  
ourselves with satisfactory  
sensual inputs... we might  
discover within ourselves a  
free energy, overunity

antigravity mechanism stop  
killing eating plants but  
unite, merge, dance,  
cuddle with them ?mary:  
ya and cuddle i want too...  
even more i would like to  
enhance my dna of  
microalgae, cannabis,  
funghi psilocibin with your  
human dna what you can  
give to me with pleasure  
sensation of ejaculating  
into my bodylike maima  
who is made by flesh  
grown from your cells... i  
would like to ingest in a

pleasure way your  
semenperma: may i also  
contribute to your  
quickenning... your  
awakening with my vaginal  
ejaculation and my  
menstruation blood ?mary:  
oh yes, i would like that so  
muchwe all four enjoying  
orgastic reunion in a  
physical bodily exercising  
manneri am sure i can  
direct my body fluids of  
living microalgae, cannabis  
essence and mushrooms  
into a warm mushy area

with swelling bodies... so it  
too will provide you with  
my very personal formula,  
with a lifeships semen  
blood ecstasy fluidit might  
eventually be a possibility  
for all of us to reach this  
level where no one aboard  
is hungry...everyone  
drinking, soaking up trough  
skin and genitals the other  
ones essence in times of  
highest pleasure  
coitusmairma: mmmh... like  
the nektar, we would enjoy  
is the diversity of your

genepool... and taste of  
semen and body fluids is  
pleasure food... i have not  
yet built genital organs...  
have you thought of the  
genital form yet maryhow i  
and you could rub each  
other most intimately ?  
perma: i feel moist  
between my legs and my  
vagina smells nicely...  
ascende would you like  
licking some of my juice  
right now ?ascende: with  
the utmost  
pleasure...mmmh... thats a

tangy sweet fresh pussy  
juice i sense on my  
tung...perma: please may i  
swallow your penis for your  
semenascende: wow of  
course...perma was very  
happy to take ascendes  
penis into her mouth, she  
instantly sucked and  
played with her tung  
around the tip of ascendes  
penis... after a minute or  
two she tasted some fluid  
from the penis and  
continued sucking and  
fondling ascendes penis

with tongue, teeth and whole mouth until he ejaculated into her mouth. she swallowed half of the semen and kissed maima with the sperm in her mouth... perma and maima having kissed intensely before. maima went down to perma's crotch where ascende still was kissing her labia and also anus caressing with his tongue. maima kissed ascende on his lips and shared some of this semen what she got

from permas mouth where he had delivered it just moments ago.maima had swallowed before some half of ascendes sperm. now maima was indulging into permas dripping vaginal openingperma being now near climax when ascende inserted his again errect penis into her anus ... he had transferred some of her vaginal fluids with his mouth onto the anus and it was readily opening... perma being

vaginal licked by maima  
and anally slowly filled and  
gently pushed by  
ascende... she reached  
out to the lifeship mary ...  
please mary unite with me  
before this coming orgasm  
... what spontaneously  
could grow extensions of  
herself in form of  
tentacles... three tentacles  
with openings wer coming  
into the anus of ascende,  
one tentacle very thin was  
going into maimas nose to  
connect to her brain and

another tentacle was seeking its way to perma mouthperma was so thankfull she could close her mouth around marys extension... being caressed by tungs and penis and tentacle... her giving pleasure while feeling ascende enjoying both his anus being penetrated by mary tentacle as well as he being inside her darm bowels she roared loudly as the flood gates of her

orgasms were opening...  
marys tentacles as well as  
maimas mouth were  
sucking up the in the  
orgasm released  
fluids.after this celebration  
of sexual orgasmic fluid  
exchange...mary too did  
release some of her  
essence via tentacles into  
maima and permas mouth  
and ascendes anus-- the  
interaction on board went  
much more physical...  
instead of talking many  
times of all them touched

each other, cuddled  
together and or rubbed  
their swelling bodies saliva  
too exchanging in kisses  
was helping to come online  
with each other... feeling  
each others wishes,  
desires and intentions

**2 ascende, perma  
and the magic  
pools in an  
alternative  
dimension and or a  
parallel timeline,  
ascende and perma  
were meeting for  
the first time in  
nature.**

second

text<https://archive.org/stream>  
was thinking about this  
material already last year  
at the wild river sense ...  
when i wrote this  
text<https://archive.org/stream>  
to understand the context i  
wrote it in, like ... the wild  
river place ...  
<https://archive.org/details/f&>  
)some weeks ago i had  
this idea of it all possibly  
happening without  
industrial activity, with iron  
dust rubbed off from big

rocks ( the ones where it looks like some orangered fluid flows out of them ... ), i wrote in german about it at

<https://www.facebook.com/> ... but forgot today afternoon to mention the iron dust... mmmh... this text i wrote today being a parallel developpment to the story i wrote in 2007 <http://www.novlet.com>, perma and the magic pools in an alternative dimension and or a parallel

timeline, ascende and perma were meeting for the first time in nature. ascende being tired of waiting for the abundance scheme to arrive, tired of society postponing to do the obvious to save mankind from harming the delicate balance on mother earth even further. he was well read about alchemy and magic traditions as well as the esoteric possibilities where one does not actually need the

society to grow  
inconsciousness but  
instead the practitioner  
itself shall create for him-  
or herself a space both  
physically and mentally  
emotional... a space what  
is most free of outer  
demands and allows the  
experimenter to dwell  
into the subjects of one's  
desire. in the case of  
ascendence, he wished for  
himself and also  
everyone... a lifeship and a  
companion, an

assistant. this way  
predestined he walked  
away from the city where  
he lived... walked into the  
forest, where he met  
perma. she herself was on  
a quest quite similar  
to ascends wishes. her  
wish and goal was to find a  
space in nature where she  
would be undisturbed from  
other human beings. and  
there she would plant food  
and build a shelter for  
herself. with most respect  
for the wild setting, to

intrude the least possible,  
to blend in with utmost  
elegance...so, wandering  
they both were, when they  
reached a wild little river  
where there was a big long  
rock in its middle. and in  
this rock then were several  
pools.fascinated from this  
sight, they both  
approached the pools from  
different directions. with  
their eyes mostly on the  
slippery ground of the  
shallow river, they noticed  
each other only just at the

pools. a moment of silence followed their first eye contact... a silence where they innerly asked themselves about the meaning of this meeting... they both were set to start a new life in solitude, away from the desires of human company and the pressure of societies... and now this. so they started to smile at each other, guessing eventually their little mindedness and silly

backward isolationism  
ways ... perma voiced first  
... and i thought i could live  
a life in solitude now ...  
with the smile on her face  
morphing into a wide  
happy grin. ascende now  
said ... so was i on my way  
to the eremits sanctuary ...  
i guess we might evaluate  
our plans some more  
carefully ... having said  
that, he started to laugh  
out loudly... with perma  
joining in. it did not take  
long before they took of

their clothes and without shyness bathed in the little river, showed each other their discoveries in plants, little animals, interesting nature signatures in the rocks...later this evening, they gathered wood to light up a fire. having found some fruits, leafs and roots they ate raw beside the warming fire, they both talked openly and extensively about their goals what they thought have led them here. being thankful

for their meeting they both  
were, reading it even as a  
sight towards a perhaps not  
solitary future.... content  
about this day they lay  
beside the fire, holding  
each other softly and  
drifting into the  
otherworld. the next  
morning, neither of them  
wanted to leave this place,  
so they just stayed,  
continuing their fruit  
gathering, searching for  
edible leaves and  
roots, bathing, cuddling and

fondling each other,  
orgasming all over the  
place in all kinds of sexual  
activities. having satisfied  
their hunger on each other  
a tinybit ... ascende was  
summoning up his  
knowledge or guessings or  
speculations how possibly  
he would be able to will a  
lifeship into existance, or  
acompanion... when he  
found himself watching the  
little animals in one of the  
pools, the algae threads...  
and suddenly it came to

him... how about this  
poolsserving as a magic  
couldron, a vessel to work  
with, for the juicing of the  
great labour .... exited he  
started listing the possible  
ingredients in hismind ...  
my own urine as the most  
important one, as the  
connection between my  
body and the body of the  
lifeship and the  
companion... also to  
nurture thealgae. then  
cannabis flower buds for  
their thc intelligence...

mushroom strong in  
psilocybin powers... datura  
wisdom... it all most  
untreated or as soft  
as possibly introduced into  
the pond. ideally. the  
cannabis and mushroom  
growing near and only their  
wind transported essence  
coming into the pond... but  
this perhaps later. for the  
beginning, i would have to  
start with a stronger more  
physical elixir ... of course  
it needs me to watch it  
many hours a day, let

it enchant my mind and feelings with its graphics, changings of form and colour... regularly i would taste some of it, give some on my skin... wash my face and hands with it so that it both will impregnate me as well as my skin surface bacteria will join the pool.... as he was laying beside the pool, painting this inner picture of a noncooking, raw food style alchemical setting ... perma came back from

one of her many walks  
alone gathering edibles.  
she was the one of them  
both who knew and or  
sensed most what could  
be digested easily. she  
saw his happy thinkings on  
his face expressions... and  
asked him about it  
while offering some berries  
and nuts. as he told her,  
she became interested ...  
and although her goals still  
were to live a simple life in  
a permaculture way  
...there was a part in her

what was fascinated by the  
idea of creating a new kind  
of living material. a  
material what would  
respond to ones desires  
and wishes.so she  
suggested to him that she  
would like to help...  
eventually their juices  
unified charged with joyfull  
ecstatical sexual  
comings... she talking like  
thisaroused them both so  
they rolled onto each other  
and into on of the pool,  
moaning groaning fucking

licking and ejaculating into  
each other...  
vaginalejaculation, semen,  
algae and water all over  
their bodies... they painted  
symbols and spontaneous  
forms onto each others  
bodies, abwechselnd  
licking some of it off,  
getting into heat again and  
ejaculating anew ...  
verstreichen it anew onto  
each other and washing  
themselves in the pools...  
what a start of  
thejourney.....

was thinking about  
<https://www.facebook.com/>  
... where i envision a kind  
of raw food approach to  
alchemy in search of the  
next building material ... as  
i am still waiting for my  
very own personal  
spaceship what will allow  
me to travel everywhere  
and live autonomously with  
plants and funghis and  
bioreactors inside ... i got  
this idea for an ascende  
chapter ...so, here is some  
of it ... i wonder when or if i

will write further, perhaps  
some times at the sense,  
because at the sense and  
schwarzwasser are some  
rockpools ...perhaps some  
more details will come to  
me about what possibly  
two beings can enjoy in  
with the natural alchemical  
pool....-----ascende,  
perma and the magical  
rockpoolparallel  
timelineasce and perm  
stay around the  
rockpoolwash themselves  
in it make love with in it

dance meditate mix their  
urine together meditate and  
drink from it at the  
beginning they ate fruit and  
smoked and ate the herbs  
the mushroom also some  
cannabis flower buds and  
psilocybinoid mushrooms  
they lay into the pool-----  
----the parallel timeline  
thing is ... some kind of  
explanation ... for a space  
and time where ascende  
and perma are both  
evolving themselves, their  
relationship and also the

material .. with what perma  
will build her house with  
and ascende his lifeship ...  
this being parallel to the  
original story where the  
global society as a whole in  
an act of charity and  
empowering every human  
being .... donates a house,  
a lifeship or something  
similar to everyone  
allowing everyone to  
sustain her/himself ...in  
this parallel timeline .... it is  
not the society as a  
mother/father figure what

comes to the rescue or  
initiates change ... but the  
individual itself uplifts  
him/herself in community  
with fellows out of mostly  
own strenght and focus on  
the inner  
powersursuppenstyleauf  
der suche nach dem  
lebendigen wahren trunk  
und baustoffdas eisenerz  
zu schmelzen... wie im film  
princess monoke zu  
sehen, vertraegt sich nicht  
mit dem wald...hingegen  
an einem felsen wo rot

oranges nach aussen tritt  
dies eisenhaltige gestein  
fein abzuraspeln ...dann  
zusammen mit psylocibin  
haltigen pilzen  
zusammenzumischen,  
fliegenpilzen, datura  
bilsenkraut, thc kraeftiger  
hanf ... mit microalgen in 4  
grad kaltem wasser aus  
der tiefe oder von einem  
gebirgswasserfall... alles  
sanft ineinander zuwirbeln  
bewegen mischen , in  
einer flachen zuvor mit  
reinem feuer gebrannten

lehm mulde ... und diesen  
saft von regen und sonne,  
sterne, wind und gedanken  
gefuehlen zu informieren,  
es auszusetzen den  
einfluss von  
kleinstlebewesen auches  
dann zu kosten... auch den  
eigenen urin beizumischen  
als nahrung fuer die  
microalgen, ergaebe eine

text

<https://ia902506.us.archive>.

in the movie splice a  
being was portrayed what

had dna from human and animal... it was female with lungs first and a long tails while the legs were tyrannosaurus like then transformed into ambhbian with gilles=0D=0Aafter that it had intercourse with a male human=0D=0Awhat caused it to become male=0D=0Aand it could drive out its wings what were flesh like no feathers....=0D=0Aas a male amphibian flying one

it impregnated its semen to  
the woman who gave her  
dna into the experiment  
....=0D=0A=0D=0Aif i  
switch to ascende perma  
bathing in the magic pools  
eating drinking  
informations from plant  
leaves microalgae each  
others urine semen female  
ejaculation fluids....  
=0D=0Aone could wonder  
what time it may need untill  
the humans have blended  
into tune of the pool  
=0D=0A=0D=0Aascende

was asking perma if she could please stick her left middle finger into his behind while she would suck his semen out from his balls... mmmh she answered... i am hungry for your protein my dear companion, might i ask you to do the same at the time ?=0D=0A=0D=0Aoh ya, we will massage each others butthole with pool microalgae thc pylocibin mushy liquid and feast on our body

ejaculations=0D=0A=0D=0/  
enjoyed the suckoff and  
buttfeeding, perma as well  
as ascende were happy  
tired lying beside the pool  
holding hands... the sun  
was strong and their skin  
covered with microalgae  
pool liquid... when perma  
sighed strongly... ascende  
asking .. have you had a  
second orgasm right now  
?... and perma says... kind  
of, but different... it felt like  
in one moment having  
eaten the m having eaten

the most tasty bite of my  
favorite meal... and in this  
moment the sunrays on  
my skin felt like lukewarm  
water when they just a  
moment before were  
burning  
hot...now  
as you say it, my skin too  
feels moderately  
temperated and before it  
started to burn a  
bit...also i feel this  
energised new flow of  
nourishment...  
we changed successfully

into plant/humans hybrids  
with our skin knowing the  
same photosynthesis like  
the microalgae we have  
drunk and absorbed with  
our other body openings ?  
perma asks with a glow of  
fulfillment in her  
eyes...=0D=0Ayes that is  
it... we are approaching  
the next evolution stage... i  
expect as next our body to  
form gills so we can enjoy  
longer submersions and dives  
in the  
pools....=0D=0Aperma...

but i would prefer some wingies first, i long to fly with the birds... oh ya, i agree, ascende says quitly with an appreciation to perma for her joice... we have been staying nearly a year here at this pool area within a mile radius... perhaps we could try some days away to see how we can sustain our process of evolving when away from the pools... perma, do not worry, i will carry some drops of the liquids of each

of the 7 pools with me in a  
flacon so we can spray it  
on us as to continue our  
alchemical brewing of the  
evolvbewareage...=0D=0Aar  
we might save some urine  
and semen and my pussy  
juice in an other flacon  
while traveling... so we can  
bring some informations of  
our flight journey back to  
the  
pool=0D=0A=0D=0Aascenc  
kissed perma listening  
inside his body where he

where he meant to hear the gushing of the sugary nutrition into his blood what is being photosynthisyzed at all the places under his skin where the sun shone on it=0D=0Athey both fell into a most satisfied sleep, a smile of arrived achieved being nearly there .. on their lips=0D=0A=0D=0Athey slept as long as the night lasted... being naked as they chose to be all the

time... the temperature of  
the air was always  
between 15 and 30  
degrees... the sunlight of  
the morning woke their  
newly photosynthetically  
enhanced skin... ascende  
was nearly crying...  
sobbering of mild joy  
mumbling to the also  
awoken perma.... and we  
will never be hungry ... and  
no fellow we have to eat  
anymore... with perma  
stroking his hair and  
kissing him softly on his

cheeks...yes, we have made this most wonderfull and important passage... we have no need to cause pain to plants no more, herself sobbing from a huge wave of emotional release too=0D=0Awhat caused their thankfull crying ? perma as well as ascende usually woke up, peed in the pool and sometimes did lie in them some minutes for a morning quicky just to jump out and hungrily

searching for some berries  
or bananas ... but this  
morning, after peeing and  
fumbling each other  
rubbing stroking penis  
and vulva... there was only  
this constant flow of  
nourishing skin cell provided  
photosynthetised  
goodness entering ther  
bloodstreams=0D=0Aso  
they stayed in the pool...  
taking some sips of the  
liquid at some times ... not  
because they were hungry  
but to sustain their

allchemical pois

poise level... fueling  
their imaginations of them  
flying above the pools...  
while ascende was  
picturing his future self  
having bat like thin skin  
and blood filled wings with  
himself growing a cat like  
furred tail what would aid  
steering the flight ... perma  
lay in the pool this morning  
drawing her future form  
with swan like wings as her  
arms and a horse like hind

legs and horse  
tail....and ... they  
could see each others  
mental workings while it  
happened=0D=0Athis too  
we have received, perma  
says while seeing ascende  
with his purple coloured  
fleshy wings fluttering on  
position while she flies  
around in small circles  
above the  
pools=0D=0Athem sharing  
each others inner vision  
signifies that their system  
has entered the field of

# local telepathy

this day went by with  
cuddelings and kisses  
while daydreaming  
enjoying with closed eyes  
seeing inside their future  
flying animalenhanced  
bodies=0D=0Aadjusting  
their sizes of legs and  
torsos position of genitals  
for an optimum of both of  
compability to the partners  
bodiesD

also the following night they stayed in the same pool, fueling their mental blueprinting work as well as providing the physical substances to grow new body parts. While all this mental imagination designing processes proceed 3 days and nights the pool water got soaked up twice half up and only with the replenishment by rainfall they could sustain the high consumption of both electrical energy as

well as mineral resources  
what were plenty with the  
microalgae of the

<https://archive.org/strea>  
gives birth to  
maima=0D=0A=0D=0Aafter  
a week flying around they  
came back to the pools,  
happy to be home  
again=0D=0A=0D=0Asoon  
the fucking licking and  
caressing started with

them both enjoying their new features=0D=0Aperma with her strong horseleg muscles and ascende with cat drive coming from his tail=0D=0Atheir thrusting against each other was very powerfull=0D=0Adays went by them experiencing further changes in their bodied=0D=0Anow their bodies did the adjustments of sizes and body part forms according to the sex positions, like when

perma is holding ascends  
s penis in her mouth, the  
body draws from all the  
animal and plant  
knowledge what is alive in  
the

pool=0D=0A=0D=0Aone  
day perma notices an  
arousal while not thinking  
anything erotic but her just  
quietly lying in the pool  
enjoying her inner workings  
and body changes, like  
muscles and bone  
reforming ... this for her  
new feeling grows and

swells ... from deep within  
a ball seems to ascend  
towards her vaginal entry...  
and with an orgasmic now  
full on, she sees white  
balls emerging out of her,  
very gently leaving her  
vagina and spreading into  
the

pool=0D=0A=0D=0Aascenc  
was in awe noticing,  
silently watching the  
miracle of  
birth....=0D=0Awhat shall it  
be ...whispers perma...so  
happy her voice and

tender the melody of her  
words=0D=0Aand ascende  
for a long moment  
wonders how far his  
imagination in right this  
moment would be allowed  
or possible to become  
material... with perma  
gurring in his ear...  
anything we need and  
want and will be good for  
all  
evolution=0D=0A=0D=0Ath  
word was not spoken  
neithe  
neither by ascende nor

perma.... it formend in  
their telepathicly shared  
mental communal place  
...like a cloud what hooovers  
above the pools with  
thoughts and feelings... the  
name maima... and it  
would be their third  
companion, equal as them,  
not depending or  
submissive, not bound to  
obey but free to share their  
pool centered evolution  
journey or live the whole or  
parts of her own life  
anywhere on the planet

maima was reforming  
shapeshifting even faster  
than her parent  
generation... when it  
cuddled perma she grew  
horse and swan and snake  
features... when intimate  
with ascende, maima  
become female cat and  
bat like  
qualities.=0D=0Amaima  
could change her  
bodymass most quickly,,  
one minute 30cm height to  
2meters lenght... the

human features were most  
seldom occurring in her, as  
the human race has  
a deep trauma with child  
abuse=0D=0Aso maima  
knew this panic inside her  
cells and allways becomes  
fully adult when in sexual  
contact with its parent  
generation  
=0D=0A=0D=0Abut the  
cosmic observer writer has  
taken a leap.... what  
happened to this little white  
balls coming out of perma  
? how was their forming a

collective what was able to  
grow into an adult  
humanplantanimal mix ...  
=0D=0Athe pools were  
filled with life these days  
after their return from the  
weeklong flight, so the  
child of perma and  
ascende and the  
mushroompsylocibin  
cannabis thc and  
microalgae... was growing  
up within  
hours=0D=0A=0D=0Aascer  
and maima were leaving  
the pool laying around it

and sometimes dipping  
swanwings and cattail into  
the water touching the  
rapidly growing now all  
colours mixing and coming  
together separating  
forming bigger and smaller  
balls... then some balls  
shapechanging into legs  
and wings and torso and  
head... being constantly  
within a small area of the  
pool as if their collective  
interplay with each others  
and ascende cat mind  
and perma swan feelings

would hold them into a  
common auric  
field=0D=0AD

when maima finished  
her adult becoming  
process not within the  
usual time span of one  
year with some animals or  
plants to 20 years with  
maimas human genetic  
heritage.. her new level of  
being a sovereign cosmic  
being was neither human  
or plant or animal. nor was  
maima in its first hours

child or adult... it was at a  
next height where it could  
choose from a wide variety  
of genetic qualities,  
transcending the earthly  
human or animal or plant.  
its genes were drawing  
themselves remixing  
adjusting inventing  
experimenting without  
end... not only was maima  
listening to its fellow  
friends ascend perma but  
to the wishes of the plants  
around the  
pool...=0D=0A=0D=0Aone

day then, maima having enjoyed being part of the choosen family with ascende and perma... maima was listening to ascendes love with the cannabis flowers... so she grew herself into a 2 meter tall flower bud=0D=0Awith eyes and ears and mouth and vagina with penis like extension... also an anal opening did maima form with thick fleshy leaves where hairs dripped from cristallclear thc potent

fluids=0D=0Aascende just came back to the main pool from a walk through the little cannabis plant forest he and maima had planted in their first years at the poolD

he was used to maima changing her forms constantly from big to small to big again, mixing panther claws with eagle beak , most unseen combinations it was materialising herself with...

most of the times it did not last more than some 10 minutes one mix... but this dripping hairy curly orangy fleshly leaf offering maima kept real for hours, as ascende was so deeply addicted to this cannabis essential being... himself adapting maimas talents and abilities while sharing touch and both penetrating it as well as asking maima telepathicly to enter into his anal and oral openings to deliver the thc delicacy

from its orange  
hairs=0D=0A=0D=0Aperma  
came back from a short  
flight while ascende and  
maima went inside each  
other... she was watching  
them for a long time with  
her main focus especially  
on ascende as he was  
mostly the male, she the  
female and maima the all it  
wanted to be part of their  
family

when both ascende as  
well maima were climaxing

for the 5th time, perma joined them ... witnessing in herself like a huge leap forward quite like a major upgrade ... as soon as she kissed ascende and savored his saliva tasting of cannagoodness thcsweet and tangyrich flavour...=0D=0Amaima now being released from her passing knowledge to ascende... was orienting heir wishfullfilling activity towards perma. as she knew from their previous

sexualcaressing times in  
the pool, perma would not  
want to stay long with the  
cannabis theme as she  
preferred other  
informations... like the  
seaweed swans appreciate  
or the grass horses eat...  
so maima grew herself  
grass and seaweed body  
parts what she massaged  
permas inner mouth with,  
gently pushed s seaweed  
knot into her rectum and  
several into her vagina,  
moving them around

in concerto... perma was  
surrendering completely  
to this unexpected blessing  
in form of body opening  
massages... it taught her  
the insides of the grass  
plant being ... she saw  
before her inner eye the  
life juices moving inside  
mairas now mostly  
grassseaweed  
body=0D=0Awhile her  
vulva anus mouth full of  
the seaweed knots and  
grass leaves... being  
moved gently... perma felt

several waves of  
cumming... her body  
convulsing and remounting  
erupting with orgasmic  
fluids saliva vaginal  
secretions and anal gland  
fluid... it all being thankfully  
swallowed and truly tasted  
analysed by a maima what  
itself was learning a lot  
while being the pushing  
dominating sexpartner this  
time

maima developed  
from experience to

experience ever grander  
mindsets ... fuelled with all  
their happy family  
cumming feelings, there  
were soon no limits for  
maima anymore... had she  
at first respected the  
human traumatas of all  
kinds forbidden and painfull  
activities... maima soon  
was able to heal them all  
from ascende and permas  
memories... like ascende  
and perma still knew of the  
past having had the  
suffering trough abuse...

but with maima s willing  
and enjoying  
bodytransformation

they both grew into the  
same kind of expanded  
mindset where all was  
good what broughtjoy to all  
participiants

image mixing of  
cannabis orange hair with  
anus vagina mouth

ascende perma  
maima family merges into

one body may what  
levitates and can change  
its fabric from  
carbonbased into  
ammoniakbased and all  
gaseous icy fire elemental  
states

◆.at home now i find  
beautifull pictures of  
orange haired cannabis  
buds

<https://www.flickr.com/photos/content/uploads/tdomf/1123content/uploads/tdomf/1123578x325.jpg><http://www.cann>

106.jpghttp://forum.sensise

reluctant to use this  
copyrighted material as  
textures for maima in the  
pool fullfillingascende  
cannabis bud interspecies  
sex exchange and learning  
does not matter as the  
idea is described clearly  
and meanwhile the story  
has allready progessed  
into the area where mary

descends  a name what  
is highly regarded by the  
author as mother of god   
i am so happy to think  
about mary as the  
ascende perma maima  
family merging into one  
physical being what not  
only has animal plant  
human abilities but also  
can change its fabric and  
gaseous density  so to  
say, when mary is with  
them, they are no more  
planet bound but can travel  
anywhere in the cosmos,

adjusting their system to  
the outside conditions

**5 their three bodies  
growing into one  
while listening to  
the cosmic  
wandering  
experiences of  
mary...**

fifth

text

<https://archive.org/stream/r>  
it is this stage of evolution  
now where ascende and

perma have learned most from their offspring maima. a level where ascende and perma became adept at designing their bodies according to each others desires, drawing from the genes of many species they encountered both in the pool area and while flying at the sea, the mountains, the plains. some days the three flew together, at other times each on his/her/its own. as they were ever progressing

with their transcendental  
cummings inside  
each other and there was  
more fine touching and  
stroking now what allowed  
the union... in such a quite  
and relaxed moment the  
three of them quite  
lazyhappy feeling each  
other, a new sensation  
arrived at them... it felt like  
they were on the way to  
completely merge into one  
body. this was the moment  
where the motherly mary  
spirit came down into their

collective... bringing with her the cosmic travel ability... the four of them sharing one body with experiencing ecstasis on a steady level. for ascende and perma this was quite new... to merge fully. they have experienced some of it with maima what is able to completely redesigning its body very quickly and for example can form as many swelling muscles as it desires or senses the fellow companions wishing

for ...and she can give them all sizes and volumes...human beings have swelling muscles in the penis and the labias of the vagina what are filled with blood when sexual arousal hits home2but still,this now was new. a union of individual beings no more feeling the boundaries of one s skin ... but feeling all of what the fellow ones feel... what was in these days mostly a mild lukewarm contempt in

their families success. how  
far they got, their  
understanding and  
compassion for each other  
such inclusive and  
embracing that the mother  
of god even joins  
them. mother of god  
mary... but not only, as  
there are a number of  
human beings called  
mary... but me the cosmic  
observer was raised in  
catholic belief where  
mother mary is cherished  
and worshipped... and still

today when me too same  
as the figures ascende  
perma maima i am writing  
about... i have  
transcended being a  
member or follower of this  
or that single one particular  
mind/emotion/bodymanifest  
... there can be many... i  
still ask mother mary for  
help and guidance... with  
knowing this, the reader  
might understand that i  
introduce the name mary  
here as well as in the  
parallel timeline alternative

dimension of this fantastic  
utopian ascende,perma  
and mary the lifeship...but i  
must not let this  
autobiographic sidetour get  
too big as not to bore the  
reader.since the first  
arrival of mary in their  
midst, the three were able  
to join up in this smooth  
and fine manner multiple  
times and allways the lust  
for sexual intercourse, the  
pleasures of feeling  
rubbing each others tight  
and prallgefueellten

openings and  
swelling muscles... this  
pleasure what was till  
some days ago the main  
focal point of ascende  
perma a3and maima s  
physical exchanging of  
constantly upgrading dna  
.... this lustfull and with at  
tines orgasmic feelings  
transported research and  
upcycle of their  
bodies....this modus got  
instantly replaced with a  
much finer and softer,  
aetherical sharing of each

others aura whenever  
mary descended into their  
pool... kind of... maima  
having lifted up the sex  
practices already onto  
most creative and  
imaginary excellent  
fantastic heights... with  
mary sharing her cosmic  
wisdom via the telepathic  
near field network in form  
of an invisible cloud above  
the pools... the family by  
both dna sharing and by  
choice were basking in the  
experiences of mary. her

feeding images of unseen  
landscapes on remote  
planets into their  
telepathnet... with awe  
they were taking in these  
at first strangely looking and  
feeling sights sounds  
smells and tactical  
informations4strange just  
the very first moment  
when the planet earth  
bound heritage was kind of  
defending its reasons to  
exist... but soon the  
multisensual impression of  
this far away worlds were

leaving feelings of new things to learn and grow... wether it were ice planets or fire hot landscapes... how mother mary was whollisticly sharing the full bandwith of how it is to live on these planets with a body what can adapt to all possible outer athmodpheric conditions5 mary s sharing were this interesting that no lust or sexual desires came up for many hours... like they were eager to cherish

every single drop of the telepathic blessing mary motherly donned to the family. the weeks went by with them approximatly a third of the time being in communion with mary and researching the physical bodies becoming one entity... they found out that at some times even their body parts where they were near each other or touched ... that there it automaticly seemed to grow together. frightened

the first time they were, as it is one thing to feel another persons emotions or see a shared inner vision... but quite something deeper seeing the physical boundaries of ones body merge with the body of ones neighbour<sup>6</sup> their three bodies growing into one while listening to the cosmic wandering experiences of mary... the first fear of losing one's autonomy gave room to an assuring certainty... that

they will learn to form spontaneous and created at will ... body communities with all fellow beings on this and all other planets in all the galaxies... who were evolved to this same height. now that was a prospect, a promise for a future with both ultimate choice and abilities to intimately connect on the soul levels ... 7 what happened from there, has its own difficulties in explaining...the sessions

where the three became one and mary blessed them with her sharing all of herself what they were capable to absorb or grasp... the sessions became gradually more like out of body travels... mostly ascende and perma noticing it while maima was still something ahaed if them two in evolution. for her there was not such a big difference between in or out of body as it was stretching her awareness

into thousands of separate species at the same time where she drew genetic informations to upgrade her transforming skills. one week they were at all the times grown physicly in the flesh and feathers and with their furs and flower buds... being nourished by the sunlight and the pool water what they absorbed trough skins mouths anuses and vaginas... they did still do some peeing into the pools while mostly

laying in the shallow pool,  
or floating at other times  
with much rain. they  
stopped to excrete feces  
at the time when they felt  
no more need to eat fruits  
and nuts.

**6 how about we  
start in our  
individual bodies  
and then come  
together in the air,  
perhaps even fly  
that high where the  
atmosphere is  
thinning could be  
another motivation**

**for our cell  
intelligence to react  
to the challenge  
presented by the  
outer cond**

text

<https://ia902305.us.archive>.  
travels on planet earth with  
marythe four of them are  
now familiar with each  
other to a gradewhere they  
can spontaneously grow

physical flesh body  
connections to each other  
so to achieve sharing one  
bloodstreamwhen  
ascende, perma and  
maima were once again in  
the pool, being joined  
again trough mary spirit,  
they were experimenting  
with growing connection  
flesh tissues and  
researching the difference  
in the united  
bloodstream,how it affects  
their feelings, thoughts,  
nerve sensations ...maima

proposed to them that they  
could practise first on  
earthlearning to change  
from a dense flesh body to  
a gas like bodywhat can  
adapt easily to extreme  
temperature conditionsit  
suggested to train with the  
active vulcanoes on  
hawaimary was most  
happy with this  
proposalsheloves the  
planet especially with its  
beauty spotswhere the  
earth is still creating its  
surface crust... the 30

miles mantle what are solid  
rocks and some meters of  
top soil ascended and perma  
agreed to this plan and  
soon afterwards  
they wondered whether to  
stay connected physically  
for the journey or the  
separate as to every  
shaping into their favorite  
flying costumes ascended  
said "€! how about we start  
in our individual bodies and  
then come together in  
the air, perhaps even fly  
that high where the

atmosphere is thinning â€" could be another motivation for our cell intelligence to react to the challenge presented by the outer conditionsperma â€" yes, let us do that, this way we will also experience at how far our individual bodies will manage the extreme cold what is up there. of course you maima will have not much of difficulties as you have learnt and inbuilt almost all of the animal and plant knowledge on

this planet, from the  
bacterias what live below  
zero degrees temperatures  
to the organisms what live  
near superheated natural  
water thermesmaimaâ€  
yes, i am so lucky that i  
could evolve that quickly,  
unlike the typical human  
offspring what most of the  
times inherits the damages  
of their parent generation, i  
was born not as a  
humanbut as already a  
true mixed being with  
equal plant, animal, human

gene shares you both have  
enabled my progress  
through your own  
alchemical achievements  
spending years at the pool  
concentrating your  
energies onto each other,  
seeking the harmonies with  
the microalgae, the  
cannabis thc, the  
mushroom psilocybin â€”  
thanks to you having learnt  
to incorporate  
photosynthesis into your  
skin cells, thanks to you  
having grown yourselves

swan wings, horse legs,  
bat wings, cat tails  
â€” thanks to you having  
given up your previous  
human identity and leaped  
forward into an all  
embracing interspecies  
being â€” thanks to your  
advanced thinking i could  
come out of perma as  
white balls of potential and  
form myself from many  
parts as cende â€” we were  
so amazed and in awe  
when seeing you emerging  
in this not yet defined white

ballspermaâ€¦ i felt then  
so secure in our way of  
evolution, knowing deeply  
that we were right to leave  
the humanidentity behind  
and grow together with the  
animal and plant  
spheresmaima â€¦ and  
here we are now preparing  
to reach out high into the  
stratosphere, challenging  
our body systemsif they  
may learn quickly enough,  
if our internal organisation  
will find the specific genetic  
data at the times wherewe

will need to sustain our  
bodies without oxygen and  
without external heat  
added they were now in  
their individual bodies,  
standing around the  
poolâ€¦! perma with her  
horse legs and tail, swan  
wings, human torso and  
head, with seaweed hairs  
on it. her breasts were  
loosely covered with tiny  
green and purple grass  
stems. ascende was in this  
moment tweaking his bat  
wings where he mixed

some purple cabbage  
tissue in, his human head  
and torso being similar to  
perma enriched with here  
and there a single orangy  
haired cannabis flower  
bud, enabling him to  
smell the thc liquids  
abundantly â€" as he  
learnt the cat genetics  
from already having a cat  
tail, he now grew himself  
some big catlegs like the  
ones from a jaguar with  
the one major change  
where he designed the

paws with again some  
sweet the smelling  
cannabuds "oh what  
acannabis lover this  
ascende is all the while  
mama going back into her  
first stages of existence,  
being a white ball, being  
reminded by ascende and  
perma about her birth  
scenario "but now she  
was not solid and thick in  
substance but rather like a  
cloud, a kind of cloud what  
one would see after a hot  
day in the early evening,

tower shaped and  
glowing from intensity it  
connecting her birth stage  
with their next task, to fly  
near the stratosphere,  
while once again  
impressing her parent  
generation how quickly  
their offspring was able to  
transcend all species  
boundries and limitations,  
with maima again going  
ahead showing them that  
phase change from dense  
flesh to gas state is  
well within their reach since

the three were so successfully adventuring out into new genetic combinations, rapidly learning from each other and the times when Mary joined their communities – their mental exchanges with mostly imaginary scenarios of all they set their focus on –. Mary was occasionally sending them some additional informations in form of symbols and most beautiful drawings so they

were flying up in the the  
air, ascending steadily, not  
in a hurry but being fired  
on trough the supporting  
imaginaries coming from  
marythey were telling them  
about the inner workings of  
the suns â€" what was  
new to them all, even to  
maimabeing fascinated  
and fuelled energetically with  
this sun insights, they did  
not notice the air getting  
thinner as higher they  
flewinside ascende and  
perma the lungs and other

inner organs were responding to this images and blueprint instructions from the sun realms as i, the author of this fantasies as well as eventually one past self of the future ascende, am a bit at a loss of words how exactly this inner organs did adapt from their previous dependency on oxygen to a state where the photosynthetic skin cells could provide all nutrient trough the incoming

sunlight â€” actually, not all of it..some of their lifesupport came from exactly this mental insights from the suns, somehow ascende and perma were able to adapt these informations and ignite theirinner spark to a powerfull atomic fusion reactor with moderate temperaturesalso maima now was glowing strongly with sunlike rays shining from its still cloud styled bodybut it became more

denser in the center all three of them, being coached by Mary with her mental support blueprint images, were now forming in the middle of their bodies a little sun what was creating a kind of auric field around their wings and legs and tails one could say the sun inside them being that strong that it needed no physical movements for them move – move now not really higher into the

stratosphere, but more slightly descending toward their hawai goalthey were cheering inside, now so totally confident that they would learn how to meet the lava, the flowing rocks bath of firewhat hindrance could their be after they had learnt to free themselves from the perceived need to eat other beings â€! what challenge could be more demanding thantransforming from an

oxygen rich air breathing  
being into an entity what  
could propel itself in near  
vacuum with the power of  
an activated inner  
miniature sun fusion  
reactorto celebrate their  
success, they were  
cuddling near each other in  
this heights, feeling the  
inner suns of each other  
reaching out trough the  
skins, tickling the fellows  
nicely â€" and they did not  
need to grow flesh  
connection tissues

anymore, the connection  
was now their suns shining  
at each other â€” what  
wonder

**7 when maima  
noticed both perma  
and ascende  
having learnt how  
to become a blue  
flame, it goes  
further in its play  
and dissolves all  
the cannabis  
mushroom animal**

**body part shapes  
and forms itself  
into a one meter  
ball of deep frozen  
ice**

seventh

text<https://archive.org/strea>  
to have trust into cells  
memoryperma ... i believe  
now that we have ignited  
our inner suns what warm  
us and replace the need

for oxygen .... tested in the  
stratosphere... we will be  
fine with the lava in  
hawaii ascende... like we  
have seen with maima, we  
might be bold and give up  
our human and animal  
shape skin and flesh for a  
moment when we  
assimilate to the  
lavamaima... i can not  
totally tell you how i  
change from white thick  
balls emerging from perma  
to the cloud like gaseous  
smoke balls... but i feel

that if you just trust in your substance, in your cells that they will be able to form whatever shape with whatever tissue you desire to cloth your spirit in...mary continues here with a picture of them being in the stratosphere, like with a heat sensitive camera...and seeing themselves being suffused trough all their veines with golden light what the before red blood was...ascende and perma were enjoying this

mental words and pictures  
exchange as they were a  
bit mildly panicking when  
they thought about their  
descend into the vulcanoes  
of hawaii what will happen  
to my bat and cabbage  
wings... will the  
photosynthetic skin cells  
not suffer from the direct  
contact to fire...when  
mama comes into their  
view playing with her body  
forming hundreds of balls  
of fire flames with perma  
sending... my dear, you

are such a blessing for  
us while we worry about our  
prized achievements and  
possessions to last, you  
show us how to let go and  
recreate maima being  
happy to receive such  
smooth words and as if  
to show how easy it all is,  
maima unites her  
hundreds of flames into 3  
blue flamed trees of 3  
meter height with all kind  
of mushroom cannabis  
flowers seaweed swan  
wings horse leg branches

....ascende allways gets  
enchanted with seeing  
cannabis shapes and  
spontaneously forms  
himself same shapes like  
maima, with perma  
following up on them  
both... and quickly both  
perma and ascende get it  
into their system, the  
knowledge how strong  
heat with blue flames can  
burn outside of their  
humanimalplant tissues  
and not consume its  
substance ....the key here

is that the wish to be similar like the neighbouring being is opening up all possible access to memory databases ... and allows the wishing individual to override eventual fears and limitations ... the wish is fuelled by emotions and spontaneous imaginary sometimes ...so in this moment when ascende wished himself into a similar shapes maima is wearing at this time... she

basically mixing it all together what she saw in ascende and permas features ... his love emotions towards maima help greatly for this major step... becoming a flame with substance inside what does not consume itself when maima noticed both perma and ascende having learnt how to become a blue flame, it goes further in its play and dissolves all the cannabis mushroom animal body

part shapes and forms  
itself into a one meter ball  
of deep frozen ice they all  
still descending and are  
seeing now already the  
shape of the islands where  
they planned to do some  
further trainings with their  
very body substances,  
density and temperature  
levels after they reached  
the volcano and maima  
was still in the form of a  
solid massive ice ball  
hovering above the heat  
radiating lava ... ascende

and perma were experimenting with their shapes, smaller bigger the wings and legs, torsos ... still remaining with the basic features what they were developing themselves with as basic costumes... but then, perma suddenly dissolves all her human and animal and seaweed and all of it so she is similar to maima, with the one difference that she is a frozen cone of ice hovering beside maima

and above the vulcano ...  
when ascende sees perma  
thiswise following maima  
he too steps into the ice  
block shape, him forming a  
flat triangle ...the three  
stay like this for quite  
some time... exchanging  
to each other the new  
sensations of being an  
iceblock what is not  
melting despite such a  
heat underneaththeir  
exchanges were not quite  
words nor images, but  
more like very slow and

peacefull pulses, smallest vibrations ... they did not understood quite how this was possible, how their ice substance was not being consumed by the surrounding heatthey assumed that the sun core in their midst was able to generate continuous amounts of cooling energyand then they flew into the waves of the ocean, changing their ice substance with the seawater, becoming more

like jellyfishes and dolphins  
and all kinds of structures  
they could see in animals  
and plants inhabiting this  
hawaiian coast so that is  
wonderful ... ascende  
beaming ... we have gone  
through hot and cold,  
changed from blue flame  
into iceblocks and can  
mingle now with all the  
ocean creatures without  
harming them because of  
being too different maima...  
i believe that in here lives a  
great force ... within the

desire to please the  
neighbouring beings, to be  
similar to them as to  
comfort them, to fulfill their  
wishes how they want to  
be by incorporating this  
wishes into one's own  
bodyperma ... i began to  
understand that when  
seeing your shape and  
substance changes, you  
have taught us well  
maimamaima ... with me  
being taught even more by  
the spirit of mary what is  
sharing with us the

knowledge she has gathered on her cosmic journey they bathed some time and perma and ascended did feel occasionally the curiosity to change back into their previously human forms, what they achieved without efforts as it was such a joyous play to change substances and shapes, they did spend some weeks in hawaii, also in the forest jungles and desert like areas, being jungle fog

and desert sand, and soon there was not much what maima was having the both previously human did not knew how to have or be too ...it was a happy time and they all felt as if they had arrived home nowfeeling welcome home in a body what can be all what it wants to be

Text:2. August 2014  
16:36:31 MESZall things  
must come to an end...but  
actually not really an end it  
is but merely a new  
beginningso... when

ascende and perma have learnt nearly all of what maima was showing them their humanimalplant genes were able to be and more... as they were accessing the elemental realms too... when they felt to have played enough on hawaii, none of them really felt like entering into space to travel between the starsone might ask ...why, if they now have the abilities to travel on space without machinery, without

being dependent on any  
outside mechanical  
things... why would they  
stay on this rock called  
earth ? when there were  
so many people longing to  
leave this planet in metal  
built privately owned  
spaceships ?perma....  
mmmh, i believe that this  
wish to leave the planet,  
what we receive  
sometimes very strongly,  
does not come out of a  
free choice like the one we  
have now after having

evolved to our bodies  
being spaceships itself...  
most of the people wanting  
to leave this planet love  
earth and its nature, but  
they are deeply frustrated  
and hopeless because of  
the many societal  
catastrophies happening  
right now...ascende ... like  
... whole animal species  
being wiped out because  
of them being used as  
medicine, or their habitat  
being destroyed for some  
gramms of gold... gold

what wanders down into the faults of banks where the only service it is allowed to perform is to back up some paper money...maima... i was so lucky to have not being directly confronted with these global humanity problems before although i felt these issues waiting inside you both to come out and some times while travelling the earth i felt the tragedy of the planet being overused and exploited...

my focus was on joy and  
learn how to tune my  
abilities ever furtheri much  
thank you perma and  
ascende for sheltering me  
from this most depressing  
realities untill nowand i feel  
that it is the exact right  
time for us to dedicate our  
mental and emotional  
focus on the healing of the  
planet and all species what  
are struggling to  
surviveascende... yes  
maima our beloved and  
guiding offspringing one,

we have been given this  
time of alchemy and  
magic, a time of  
concentration on ourselves  
and all what we want to  
achieve and be ... perhaps  
also in order ... with the  
cosmic intelligence  
protecting us from the  
cries of despair and  
requests to save the  
ecologic balance... with the  
creating allunited and  
uniting one force saving us  
for a time like this when we  
have ascended individually

in our little family to a  
sovereignty this firm and  
solid... that we might take  
on some of the waiting  
tasks now from a whollistic  
point of view...perma  
sends here an image into  
their round of the three of  
them flying over deserts  
and fertilising the barren  
ground with their joyfull  
intermingeling with  
ascende creating an image  
what shows them forming  
an animal approaching the  
huntersand speaking to

them, inviting them to receive the blessing of the three united in one body... and the hunter being kissed and caressed by the three in the form of the usual prey of him... the hunter crying from relief that he does not need to hunt and kill anymore ... as he has learnt while being kissed and cuddled, that there is a greater hunt and achievements to be followed ... the hunt for adding other beings

abilities to ones very own  
arsenal of genes through  
joyful and sexual intimate  
contact and maima drawing  
an even bigger scenario,  
showing perma and  
ascend a little movie how  
the vibrations of the  
healings experienced by  
this one hunter attract  
others who are searching  
for bettering their lives ...  
so they come to hundreds  
gathering in this newly  
greened deserts perma  
showed... and in these

grounds the human beings  
merge together most  
pleasantly in the same  
ways like ascende perma  
and maima practised in  
their times at the pools ...  
fumbling licking slurping  
each others sexy semen  
vaginal juices... reaching  
within each others mouths  
vaginas anusses to  
inseminate impegrenate  
the seeds of hope and  
change and  
evolutionascende perma  
and maima were shaping

themselves in a sweet  
mushy horny smelling mist  
what embraced the  
continuously growing orgy in  
the awakened desert... the  
very substance of maima  
perma and ascende  
wetting all the bodies and  
entering them while all the  
fucking sucking licking  
slurping fondling went on in  
this orgy, the woman and  
men who arrived now by  
the thousands every day  
and reached hundreds of  
thousands within a

month... the people were learning. Most quickly all of the abilities what perma maima and ascende have learnt in years at the pool. One could think that it is because the three of them entering all the lovers bloodstream via themselves being the mushy mist covering all of the orgy... what is mostly what happened... but to look at it from the mental level... the human beings what have seen in the

televised news about  
vast areas of deserts being  
greened over night and  
many people gathering in a  
lovefest there... they were  
so happy to have found  
this moment in time and  
space ... and their  
thankfulness was the  
portal where the mushy  
sweet substance of  
ascended perma maima's  
very own bodies ... could  
enter to the very roots of  
their pain and sorrow  
laden cellsit was only

days after the lovefest started when the animal and plant enhancement features were showing in the orgy participants ... them having lost all sense of identity and ego, status in society... them being drunken high and berauscht from all the sex and smells of the fellow human orgy partners as well but even more by the misty mushy fog what was ascendepermamaima... their brains were mostly

not forming thoughts or following concepts of what to be or what to do.... the instincts were stronger, the desires of entering that hole and this and that one over there... with ones penis tongue and finger... licking that ass and this vagina, swallowing this penis what is just now leaving a vagina covered with juice of life...all these hornyness and plentyfull variations of intercoursing with each other brought

out the body part forming  
abilities spontaneously...  
so here one man was  
growing his penis to the  
size of an elephant one...  
being followed by a woman  
lusting after this massive  
shaft to cover it with a  
fitting vagina what allowed  
her to grow her pelvis  
middle body part to a size  
big enough she could  
comfortably sit on the  
elephant like penis ... all  
the while them both not  
being astonished or afraid

or scared but surrendering  
fully into the fuck of this  
momentwhile at the little  
lakes what were now  
growing inside the  
notanymoredesert... in the  
lakes the fuckers and  
suckers were discovering  
how they could stay under  
water for hours ...  
ascendemaimaperma  
substances being in the  
lakes too... and the  
lovesfestival celebraters ...  
with time passing and  
some of the people being

here now for weeks  
nonstop... without eating  
anything except for each  
others sperm and vaginal  
juices... as well as being  
sustained by  
ascendepermamaima  
droplets... some of them  
were awakening out of the  
fuck trance... forming their  
arms into wings and flying  
up above the green plants  
and pink naked flesh  
covered loveorgy place  
what covers now at around  
fifteen hundred

squaremiles with human  
participiants counting now  
around a million men and  
womanthis film what  
maima is actually showing  
to perma and ascende...  
did become reality while  
them three watching  
maimas vision... them  
meeting the hunter first to  
heal him with intimacy,  
then taking him with into  
the deserts where their  
essence wetted the  
grounds and their lovefest  
with the ex-hunter now

learning lover started to  
send ripples on the planets  
news networksit is now a  
month after they started  
this dream... meanwhile  
three hundred thousands  
of the lovefest participants  
have evolved to the stage  
where they can form their  
body parts female or male  
choosing from the same  
range of animal and plant  
genetics what  
ascendepermamaima  
have... all sorts of wings  
and tails being mixable

with mushroom penises  
and cannabis flowering  
vaginas of any imaginable  
sizes and shapes. these  
three hundred thousand  
were now leaving the place  
what brought them this  
immense freedom, they  
did still have to drink from  
each others sexually  
joyfully produced liquids...  
but some of them now  
were on the trail of how to  
merge with each other and  
with all fellow creatures...  
not necessarily in sexual

ways... they worked on it  
while flying away from the  
original lovefest areawhile  
them threehundred  
thousand now leaving  
there were ten thousands  
arriving each day... the  
leaving and arriving crowds  
gradually acceleratingwhile  
this upward curve of more  
individuals passing trough  
this nonstop orgastic  
joyfullfillment bursting  
spiral of a planet healing  
lovefest was accelerating  
the ones who left were not

too short of knowing what  
ascendepermamaima  
knew before they went into  
stratosphere...they  
discovered the growing of  
body connecting flesh  
tissue while they were  
resting on the ground in  
between their flights about  
fifty thousand now flying  
humanimalplant through sex  
evolved beings were  
spontaneously ascending  
higher and higher in one  
flight towards an other  
desert area... their motive

being to allow people from  
other continents to reach  
the lovefest easier this  
fifty thousand then  
discovered how to ignite  
their inner suns and how to  
warm themselves in most  
chilling surroundings... this  
discovery then being  
samewise accidentally or  
unintended followed by  
some members of the  
flying lovefest playing  
around with their  
substances becoming  
cloud like... what was then

the main accelerating  
factor ... Â can one  
imagine fiftythousand  
human beings what  
learned how to rebuild their  
bodies ... spreading out  
their very body substance  
onto hundreds of square  
miles of deserts.... the  
desert they chose was the  
one in utah... ( the one  
where  
ascendepermamaima  
fertilised themselves into  
being the sahara one ) ...  
can one imagine the desert

of utah blossoming with  
the very life juices of  
fiftythousand flying evolved  
humanimalplant beings...  
and short after the area  
has been greened they  
partly remained in tree  
animal lake bodies while  
this time the incoming  
spring of visitors was the  
most                    massivethe  
saturation of awareness in  
all the ground and plants  
and now formed lakes was  
that high that as an effect  
the visitors of this utah

lovefest did not need even sexual intercourse to evolve but simply to bath in the lakes to watch the humanimalplant beings metamorph constantly while breathing the air what too was highly thickly filled with evolvensence... but of course no visitor could leave on its clothes, it was simply absurd to stay clothed when being in that new paradisemayloveheal<https://> is the eight text of a series

where i explore ascende  
being totally notech but  
only working with body and  
fluids and sex and union  
and wishcraft in the sense  
of ... i want to be that ...  
and not giving up spending  
time with lovers and in a  
most ideal space ... untill  
this evolution goal in ones  
own body is achieved... no  
news no contact to other  
people not sharing the  
alchemical quest ... no  
charity and no community  
service ... untill that

moment when one has  
climed up to the highest  
step of the ladder what a  
human being can achieve  
on this planet earth using  
only juices given with  
pleasurethe seventh text  
leading to this eight one  
isat<https://archive.org/strea>  
i am explaining at the site  
where i wrote ... i think i  
wrote about an hour on my  
iphone in notes, getting  
higher and higher... when i  
had to make it a stop for i  
needed to go to a shop

buying tomatoes ... oh boy  
was i high from my writing  
... without the wild river,  
without smoking, just being  
struck by inspiration left  
me as high as anything  
after writing feverishly one  
hour, i am so thankfull for  
being able to channel this  
kind of fantasies. like i said  
once, i am channeling my  
future self ... that i can  
imagine this kind of  
situations and scenarios  
makes me proud of  
myself... like ... i feel that

these moments are for  
what i have been preparing  
myself-----my goal  
today was to again go to  
the wild river sense to bath  
and dance ... but guess  
how far i came, not even  
half the way and i was so  
overwhelmed with creation  
forces what to write in the  
next progression of my  
ascende notech line... it  
started with the  
comparisation from the  
original writing ascende,  
perma, maima and mary

the lifeship at  
[http://www.bookrix.com/\\_ekandreas-buechel-as.../](http://www.bookrix.com/_ekandreas-buechel-as.../) to  
this line i am now in ... and  
i believe that this line now  
is the better one in  
comparisation as it is very  
strictly setting the evolution  
progress on individual  
training first and  
community sharing later ...  
my thinking today then on  
the bike was like ... where  
would one being go when  
all goals of selffullfillment  
are being reached at this

moment ... naturally it goes back to the greater community ... so that is how ascende perma and maima with assistance from mary are now in this eighth text of the ascende notech line sharing their evolution achievements in a bit quick manner with millions of other human beings ... them of course no more humans ...ascende and perma are now ex-human beings and really also ex-

humanimalplants with what  
maima was born ... now all  
three of them have gone to  
blue flame and ice state of  
living so they could be  
called eventually  
elemental enabled  
incorporated ones

# 10 ascende maima perma sliming the desert

<https://archive.org/detail>

it really should not be a big thing how many purely humans were keeping their line of genes and not in the same line evolving as the elehumans therefore can be a multitude of totally different scenarios what happend in 2020 to 2040

this one line we followed in this writing till now was 2020 ascende and maima meeting at the wild river pools 2025 the saharan lovefest may we think of an again alternative line departing from 2025 after the saharan lovefest.... as ascende maima and perma were spending their substance into the desert sands over and over again... they formed many root relationships what is eventually sensual till erotic

as they were kind of fluidly  
kissing fondling and mixing  
each others fluid bodies  
while moving trough the  
desert sands... leaving  
behind seeds what were  
soaked wetted with  
ascendemaimaperma  
slime... sometimes they  
came out of the sand and  
errected their still slimy  
fluid with a mix of animal  
and plant fleshyness in the  
water... ascende was like  
purple cabbage coloured  
and maima was greenish

with little yellow knobs  
what had orange hair on  
them... it still attracting  
ascende with his cannabis  
preference perma was  
growing herself some  
white swan feathery  
extensions and some other  
horse mane and tails... she  
caressed maima with her  
feathers and manes tails at  
all its greenyelloworangy  
bits ascende extending  
now some soft thin fingers  
with what he was stroking  
maima and perma at the

same time they enjoyed his soft touchings for quite a while at one moment they both formed holes in their bodies with ascende this invitation not missing to notice perma and maima were concentrating now their blood like slime around their newly created openings... following the old swelling body design what some animals shared with humans... automaticly ascende was now gathering his slimeblood

into two of his fingers what became now stiffer and harder with the hot fluids pressing inside he penetrated maima and perma slowly then stronger with them moaning for more in slime vibration waves of satisfying chemical transmitters push deeper... rub my hole with your prick... make my swollen blood vessels rejoice lustily with your stick massaging entering leaving me .... was maima

sending neurochemically  
trough to ascendes him  
sending to it ... oh how  
your hole is embracing me  
and the walls of your inside  
channels pump me squeeze  
my drops out of me... will  
you receive my load of  
white essence... yes  
please deliver your most  
refined juice to me too ...  
perma now sending ...she  
before enjoying ascendes  
penislike prall gefueellt filled  
finger what was slowly  
moving quitly little bits in

and out of her... another  
part of her attention in her  
manes and tails finely  
peitsching ascendes parts  
what were not burried  
inside maima it being  
juicing over and over as a  
response to ascendes  
thrusting her firm tight  
nerve gathering hole and  
silently crying out loud in  
stakkato with each fast  
and hard push ... joy cries  
...

ah..ah..ah...more...ya...dee  
...push.... what turned

ascende on such he came  
in simultaneous  
explosions of his both  
swollen red extensions  
inside perma and  
maima....

mmmmhh...schmatzten  
die beiden loecher... both  
holes sucking the load with  
enjoying noises ...  
digesting it in this moment  
causing their both bodies  
to send out scents into the  
desert where many flowers  
and plants were growing  
quickly since their arrival

**12 is fuedeli fescht,  
aes faescht im  
fuedli**

<https://archive.org/detail>

after their slimy  
loveplay and ascende  
ejaculating both in maima  
and perma... perma was  
asking ascende... i wonder  
what it is that we both are  
your holes expecting your  
seed to impregnate us...

when maima says... oh  
this is millenia of male  
female behaviour and  
ascende has still alot of  
catching up to do with his  
male side... that i  
understand... perma says  
softly, and me i feel quite  
okay receiving at this time,  
but to tell you both, i too  
would like to deliver my  
dna specialities with a  
white hot load of shooted  
sperm mmmh.... maima  
says, i am looking forward  
to embrace your swollen

extension into my womb...  
with ascende now sending  
... and me, i will to create  
myself a vagina what will  
make you feel at  
home...how invitingly your  
both offers what i will  
gladly take up when time is  
ready for that so they were  
ending their first loveplay  
after arrival in sahara with  
the research of sex role  
behaviours meanwhile the  
sahara began to bloom  
starting with the lovers  
slime soaked parts the

three kept themselves  
together so their power to  
fertilize more greater areas  
would be strong but each  
time they climaxed  
orgasmotopian some of  
their substance stayed in  
that ground where they  
found joy inside each other  
this substance was then its  
own being what began to  
evolve and organise and  
exercise its abilities in its  
own sovereignty  
maima... these are our  
descendants ... or

babies... how wonderfull  
we can grow our family  
perma... and i believe that  
they are at a higher  
intelligence and capabilities  
even than when you built  
yourself with the aid of the  
white balls substance what  
came out of me.... your  
birth maima was after me  
and ascende had become  
humanimalplants ascende  
... now that we are three  
elemental enhanced  
humanimalplants... what  
powers might our children

have... them all watching in  
awe how at the space  
where they just had  
celebrated the sperm  
uptake... where so much  
plants and animals were  
populating it... perma...  
mama have you got any  
idea, how you and me  
participate with this life  
enabling birth ? when it  
says ... you have still your  
female eggs in you from  
the time you was fucking  
with ascende in the pools...  
i mean, as ascende has

still his seed producing  
balls you have the egg  
hatching mechanism kept  
active in your now  
enhanced body... so every  
time when you got deeply  
touched by an emotion  
thought or with some  
seeds sent to your eggs  
waiting in their nest inside  
your mostly humanimal  
womb... you did soak up  
the information what  
pleased and made you feel  
good at home... perma  
now, glowing of pride in

her motherly abilities... and  
my eggs impregnated with  
all the joy from being inside  
connected with you both  
ascende and maima....  
these eggs have we left  
there when we moved on  
for a next space to  
discover ourselves  
ascende ... oh that is so  
cool... kind of ... there is  
no more hatching to do,  
our babies now are this  
intelligent and sovereign  
that they take care of  
themselves at the moment

the eggs leave perma  
mmmh... perma sends... i  
have not noticed them  
leaving me... when  
happened that... maima  
sends...oh that was right at  
the moment when ascende  
spritzte shot of his load of  
semen into us... i noticed  
in you the eggs leaving you  
as soon as the information  
of ascende got in contact  
with them with perma  
asking... and you maima ...  
have also given  
befruchtete eggs into the

sand what gets answered  
by ascende... i believe so, i  
felt through my extension  
penetrating her how she  
shuddered samewise as  
you when you gave out the  
fertilized eggs when maima  
says... yes i too have a  
mini egg factory working in  
me what i have copied  
from you as there is a  
strong wish in me to help  
fulfill ascendes wishes as  
the male of our group...  
not that he would be  
dominant, but his balls

seed factory and expulsion  
joy force have a good drive  
for our project to fertilize  
this vast desert when  
ascende asks maima... but  
you could have copied that  
too and become a male  
seeder too .... yes maima  
sends... but then as perma  
does not likes too much of  
her being penetrated too  
strongly, i felt that i could  
do that for us... hold my  
butt to you so you can give  
it to me hard  
isfuedelifescht

mmmmmhhh... oh i get  
horny again.... asende  
moans as he receives  
maimas signals perma  
sending now... let me this  
time be the one who is  
ejaculating my load into  
your vagina ascende ... ya,  
he sends ... i will copy your  
egg preparing mechanism  
and send out the eggs  
fertilized by you both  
maima and permas  
delivering your hot white  
seeds in me

# 13

## saharandesertborne

13 the first generation  
of elemental enhanced  
humanimalplant beings  
born from maimas and  
permas eggs in the  
saharan desert ascende  
perma and maima were  
resting from their slimy  
loveplay discussing their  
male female reproduction  
organs and how their

psychological states of  
minds were influencing the  
next generation of  
elemental enhanced  
humanimalplant beings...  
through their mating  
behaviour... preferences of  
how one likes to be and go  
inside a fellow being...  
giving or receiving or any  
active passive combination  
of body forming  
exercises... but wait ...  
they have not yet  
discussed into detail their  
imprint on the behaviour of

the next generation...  
maima.. for me it is the  
first time watching a  
descendant generation, i  
am so happy to see them  
being sovereign from the  
moment they left mine and  
permas body... perma...  
yes i remember me and  
ascende being in the pool i  
gave birth to you as white  
balls ... we were leaving  
the pool then so that you  
could have enough  
playspace to discover  
yourselves and what you

wanted to be ascende...  
but still... i rember... us  
projecting our wishes too  
onto maima, while we lay  
beside the pool and  
occasionally touching  
caressing maima in a  
nonsexual but tender  
supporting way maima...  
now you bring up these  
times i find in myself  
notions of me at this first  
hours of me being spread  
over a collective of dozens  
of white balls ... receiving  
your wishes while your

supporting arms in the pool  
were layed out to which i  
could go to when i was  
playing with the several  
balls i was born the  
organisation of the several  
white balls into a collective  
coordinated formshaping  
body was greatly helped by  
that short moments i swam  
into your arms and got  
access to your soul  
informations of course the  
big part of essential  
humanimalplant  
informations were stored in

me as egg from you perma  
with your sperm ascende  
having it fertilised your  
both informations being  
humanimalplants ones ...  
in the pool with the  
microalgae cannabis  
mushroom intelligences i  
was well informed too with  
their psychadelic  
connections to the cosmic  
streams of life... but still it  
was a strong impulse  
touching you in my very  
first days of life ascende ...  
when you very quickly

matured ... i saw my  
wishes well in you realized  
... i was happy for that...  
and i thank you for helping  
me to fullfill this fantasy  
where you grew yourself  
into a body what had  
cannabis flower buds all  
over juicing thc while we  
had a pleasent sexual  
intercourse perma...  
yes,that was maimas first  
sexual intercourse after it  
had formed itself into a  
female styled  
humanimalplant being...

and we were surprised that your childhood was advancing so fast, with you maturing quickly at the time we stayed out of the pool offering at some times our arms to hold and nourish you emotionally and us too... ascende... as we were at the times no more purely human beings but already evolved into a mix of human animal and plant genetic makeup... we were only mildly surprised to see your childhood only

lasting some days... in  
animal worlds are some  
species what are  
geschlechtsreif able to  
reproduce themselves in a  
very short time too  
maima... and now it looks  
like it is even shorter.... as  
we are watching the very  
first generation of  
elemental enhanced born  
humanimalplants as they  
are continuing the wetting  
of the desert like we  
started it... i wonder how  
we want to see ourselves

in relation to these our  
descendants... will we  
send them our fantasies  
too like you did to me  
ascende... with me being  
bytheway totally okay with  
your doings as i have  
picked them up willingly  
and was happy to engage  
with you in our pleasurefull  
sexual plays after i  
matured to what the  
humans call adulthood  
perma... i was not sending  
my fantasies to you as i  
was content with the

loveplays ascende and me  
have experienced in the  
pools together... but did  
not feel like you and  
ascende were doing  
something unhealthy  
together... as we three  
have evolved even further  
into elemental enhanced  
humanimals and see this  
eggs having left us some  
hours ago already growing  
themselves into palmtrees,  
being lakes and grass and  
flowers... snails and desert  
mouses i believe that they

do not need our attention  
nor we need their vital  
power to fulfill our needs  
ascende... mmh ... sounds  
like i would have done a  
mistake when i was  
subcounciously sending  
out my cannabiscopulation  
fantasies to maima with  
maima coming in between  
them ... what i have picked  
up being curious what fun  
and satisfaction your  
ascende desires could  
deliver to my own evolution  
we are not now discussing

mistake or no mistake but  
what perma and me are  
trying to research in our  
round of three ... is... what  
could our possible direct  
interaction with this totally  
sovereign first born  
generation of elemental  
enhanced  
humanimalplants be...  
ascende... sorry perma for  
thinking you would accuse  
me of being a bad  
rolemodel for a freshly  
matured being... perhaps  
there are some doubts in

me from my time as a  
purely human being before  
i was meeting perma at the  
pools, when i was  
androgynous .... perma,  
you are excused and  
forgiven already as we  
have found in our round  
that maima was happy  
having your fantasies as a  
possibility to engage with  
us what do you propose ...  
shall we leave them alone  
or are there any  
possibilities we could learn  
from them... maima... of

course there are, imagine  
if we could have access to  
their genetic knowledge ...  
how our eggs and seeds  
again will become quicker  
to mature and even more  
sovereign in their actions  
to heal the planet...  
perma... yes right you are,  
there is this vast task of  
the deserts being greened  
in order to give a place to  
all the refugees migrating  
the planet looking for a  
place where they can  
flourish without fear of

being hurt ascende... i  
believe that this  
generation, these our  
descendants from our  
trio... will perhaps still have  
some of our human topics  
with them as we at their  
birth still were on the quest  
the search of male female  
balance but that they are  
right busy working on the  
greening of the desert... let  
us watch some times and  
perhaps even mingle  
ourselves with them if they  
are searching contact with

us... but let us also  
continue in our trio the task  
of me becoming the  
female sex and my switch  
from producing eggs while  
before was for a long time  
producing semen perma...  
so yes, we spend some  
time in our trio coming full  
circle with maima and me  
growing testicles and  
seeding you... mmmh... i  
feel my schamlippen  
female genital lips already  
coming together to form a  
kind of evolved penis... like

the plant sarracenia  
oreophila... what is a  
fragile thing, not made for  
fucking wildly but to  
smoothly enter your vagina  
and anus my dear  
ascende and to deliver in  
you great amounts of my  
sweet honeysuckleish  
essence maima... where i  
will grow myself a thick  
meaty prick i will satisfy  
your desires to be strongly  
pushed into, as you did to  
me so well donating me  
thisway much orgasmic

moments of being used  
thoroughly ohoh ladies ...  
ascende now sending.. or  
should i say horny  
stallions... you are causing  
my penis to fall apart in  
two halves to form a vagina  
what will satisfy your most  
interesting offers of  
penetrating me... perma...  
so here we are, already fit  
and composed enough to  
engage again into losing  
ourselves in each others  
embraces and sexual  
welldoings... maima... well i

agree, we better get one  
with having you fucked  
properly in all holes, as you  
are already getting your  
vagina built ... and my  
whale bulls inspired penis  
is also quite ready growing  
and i feel like filling  
someone with it  
completely... mymy maima  
...perma jokingly ...what a  
bully you can be oh i see  
you drilling your massive  
thing into him... make sure  
you get it into his ass right  
up to his brain ... as this is

a human imagination what  
only now becomes  
possible... we can put  
brains in our bodies  
wherever we like to place  
them ... we might even  
experiment with brain cells  
growing in a special layer  
under our swelling muscles  
... when we could right  
massage each others  
brains with brains....

# 14 elehumans going techno

14 elehumans going  
techno while ascende  
perma and maima were  
exercising themselves in  
the gender role model  
switches in order to  
balance out each ones  
male female equilibrium...  
the first born as elemental  
enhanced humanimalplant  
beings

sahabornelehumans were preparing the saharan desert to be a home for all the human and animals of this world who did not find themselves to be welcome and or treated with the respect a human as well as an animal being deserves the saharan elehumans were kind of everywhere so when some similar injustice was on its way to happen like it happened in the world sadly enough many times

at many places ... perhaps  
most of the paining  
happenings not coming  
from one really wanting to  
cause pain but out of an  
uncounciousness deficit  
one needs to fill...  
somewhere on ones way  
one got hurt and eventually  
one will transport this hurt  
onto someone else with or  
without knowing that one  
does so also an other  
reason for a deficit is a  
lack of flexibility in ones  
mental emotional and

physical body... like  
thinking too much of a  
trouble or reliving the same  
traumatic moments and  
sitting too much in a  
cramped body position...  
deficits can happen too in  
a situation where a strong  
wish of someone does get  
nearly enough realised in  
ones life... one being  
distracted from ones  
concentration of reaching a  
particular goal...  
distractions what  
eventually are caused by

stuff what one would want not to be in ones life but they are probably showing one where his/her service could be found to benefit the greater cosmic community of all beings knowing this because they have been purely humans too and they still can access the human mass consciousness... the saharan elehumans were sensitive to the newly arriving human and animal beings treating each other

nice and respectfull they did not police the place like standing at the crossroads watching everyone to walk in line... no, they could sense what the problem was somehow about and fill the gap with their capabilities to be any kind of substance lifeform shape object subject of possible existance ... so there was a saharan elehuman being serving a newly arrived small time thief or a merchant or

basically any character what  
has felt the need to possess  
more security in form of  
money or trading goods...  
so when the  
sahabornelehumans  
sensed such a lack of  
abundance in a visitors life,  
they created the remedy  
from their own  
bodysubstance ...its bodies  
forming all the riches the  
person was longing for...  
mountains of gold, palaces  
of marble and what more  
one can imagine of

luxurious splendour to  
possess... usually the newly  
arrived person did learn  
quickly to let go of this  
riches given to him  
unconditionally ... no one  
took the gold with to go  
back to the cities of the  
purely humans... in the  
areas stimulated by the  
sahaborne humans was  
no shortage of food and  
shelter most everyone was  
most of the time happy to  
occupy oneself creating all  
kinds of fantastic

manifestations... with the  
saharan elehumans  
serving as the wizzard or  
gene who formed  
something out of thin air ...  
what was actually like that  
partly as the elehumans  
have learnt to recycle the  
co2 as well as the nitrogen  
and more stuff the humans  
have emitted thanks to  
their inefficient burning of  
materials some of the  
purely humans visiting the  
stimulated greened desert  
places were bringing their

animals with to discover in themselves after eating from the fruits and vegetables of the stimulated places that they just as well could release the animals this food here was so nourishing and wholesome that they would need neither eggs nor milk nor meat anymore food being grown from elehumans was so strong because they were putting themselves into the trees from time to time to

strengthen its growth also  
they lay themselves in fine  
mists of elehuman watery  
substance over the  
vegetables in the mornings  
as to water and inform  
them of elehuman genetic  
immun system  
informations some purely  
humans stayed a week or  
a month, some years  
before they decided to join  
the elehumans with giving  
them either their word...  
yes i want to leave the  
purely human state and

enter an evolutionairy  
broad road what leads to  
one becoming a being able  
to be hot as a blue flame  
while having a core of an  
iceblock ... i wish to be a  
being what can form its  
body picking from all the  
genetic informations what  
are embodied on this  
planet or they could just  
offer the  
sahabornelehumans their  
semen or vaginal  
ejaculation fluids as a  
contribution to the

community as well as a  
decision to mix with the  
elehumans beyond food  
but to take up their semen  
and eggs too for example  
one purely human is  
curious and thinks why not  
try this elehuman thing, i  
have been purely human  
long enough... so one can  
imagine that there would  
be several ways to deliver  
and take on semen and  
vaginal ejaculation fluids...  
sucking it off the  
elehumans something

some purely humans preferred, others imagined being a flower what sends out its pollen with the wind and be fertilised by air transported pollen coming on one fruchtstempel in fine mist the sahaborne humans liked these scenarios as they were much further near the plant worlds in their genetic makeup with a little animal and lots of elemental forces in them when then such a dreamer

purely human closes its eyes and sees him/herself being a flower sending out pollen and getting dusted with the ones from elehuman flowers, the sahaelehumans misted their bodies into such a dust them taking on a airy fairy low density for the finest purely humans ... while with others hanging onto their sex experiences before ... needed some rubbing of genitals with a dense cloud forming itself

into fingers with swelling  
muscles behaviour pulsing  
like with blood ... what  
made the densely caressed  
purely humans climax and  
ejaculate their male or  
female most inner juice...  
some of the purely  
humans did not want to  
change ... and went back  
to the cities telling others  
or not... but millions came  
and the television drones  
were now entering the  
zone, what was quite  
exciting for the

sahaelehumans as the  
knew that there would be a  
chance to help the purely  
humans with their  
technological progress why  
would the sahaelehumans  
want purely human  
machines to evolve... first  
because every progress in  
technology bears the  
possibility of more people  
being allowed to take leave  
of having to work a job  
they do not like ... and the  
sahaelehumans hoped that  
when the drones fly back

to the purely humans cities  
for maintenance, their  
engineers will discover  
their elehuman enhanced  
circuits and some files in  
the enhanced software  
operation systems what  
would explain in detail how  
materials could be created  
what are billion times more  
efficient in electricity  
conductance ... the new  
code languages within the  
camera electrobirds will  
enable their computers to  
grow their processing

speeds      samewhise      a  
million times... as this code  
was so simple and going  
the most fluent way ... the  
television      networks      had  
hundreds of drones flying  
constantly now over the  
saharan lovefest of 2020  
and they noticed after only  
a couple of hours of the  
cameras      sending      via  
satelite      broadband  
connections....      that      the  
quality of the pictures was  
increasing by the minute....  
like...      they      sent      drones

what could record and transmit 200 x 300 pixels in realtime... when it was at 20 thousand x 30 thousand pixels within one hour and 20 million x 30 million 3 hour later .... delivered in completely new algorithms what could be delivered through the network channels but not analysed... kind of the purely humans decoding the signals were not grasping the logics of this newly composed picture

data.... that was when some of them decided to quit their jobs and visit the lovefest to ask the elehumans if they would explain this new software to them... as obviously the improvements of the picture quality must have been a connection with something elehuman as they arriving at the saharan lovefest the elehumans were most happy to teach them... one method they offered that

the programmers were relaxing their minds so that in a meditative state the elehumans could send the code telepathically, what they had written the drones new operation system this was happening on the subconscious level at some purely human coders meditations while others saw the new coding language being explained by the elehumans in their dreams before their inner eye while relaxing their

bodies in pools ... some programmers chose to become elehumans and for them it was the quickest and easiest learning of vast new knowledge they had ever encountered... like the learned all the dna alife from billions of animal and plant species plus all the human stuff with on top of it all the very coreness of fire water earth and air... and this coders now elehuman coders were no

more interested in  
disassembling the drones to  
see what kind of new  
hardware the elehumans  
have transformed the  
before purely human  
motherboards in they  
wanted now to build alive  
computers meaning flesh  
and plant tissue based  
blue flamehot icecold  
formed flying cameras....  
so they invented with their  
own body substance again  
million of times more fluid  
and smoothly operating

drones with a power consumption of miliwatts and an picture qualities of new clarity and a broader visual spectrum broadness ... these cameras recording all kinds of waves like infrared and the aura of humans animals plants... they were human coders a half a day ago and now they were elehumans droning the skies with dozends of parts of them being the first truly organic alive robot

cameras who could fly the  
next they did was  
multiplying their parts  
gaining mass out of the  
infinite pool of cosmic  
energy and building  
satelites or organic drones  
what orbited around earth  
in the near space beyond  
the air belt atmosphere...  
with some organic drones  
flying into the purely  
human settlements  
transforming themselves  
on the way into tv sets  
displays of all kind of sizes

they too multiplying and  
gaining mass around 100  
000 of these displays were  
arriving in the settlements  
placing themselves  
decently where it would not  
disturb purely humans  
ways and they did not only  
displayed what happened  
visually at the saharan  
lovefest as this was done  
by all the purely human  
drones but they opened  
the watchers a interactive  
experience the organic  
drones now displays too

were also inviting to transmit informations via skin contact like... a purely human what was discovering a tv set at a place outside near the settlement he lives could cuddle him/herself in the organic cameradisplay elehuman thingie like in a blanket and the elehuman blanket would touch the naked purely human learner in ways what were desired by the learners... some got horny while

feeling the life fleshplant  
blanket cuddling and saw  
before their inner eye the  
blanket entering their  
vagina and anus and  
rubbing ones penis others  
were just laying still in the  
blanket enjoying elehuman  
dreams told in all sensual  
ways.... sounds smells  
touch and taste with inner  
visuals some did not leave  
the elehuman blankets but  
chose to become  
elehuman too... this ones  
were then again inventing

themselves anew to  
become all kinds of helper  
organic machines what  
would offer the purely  
humans in their daily tasks  
some few days after the  
first cameradisplay then  
blankets landed in the  
cities, the number of  
converts began to  
multiply most quickly...  
kind of half the people  
living in the big cities chose  
to be elehumans .... with  
nearly all of them  
dedicating their body

designing powers to aid the other half of the population doing household tasks and producing things within a week was no more food being produced the old way ... elehumans have shown the farmers their techniques to grow vegetable fruits and grains... and they could deliver a few thousand of kilograms what was enough the population of a 20 million city... now a 10 million city as the

elehumans were not  
needing to eat a fruit or a  
vegetable also cars were  
standing still some days  
after the elehuman visit in  
the purely human cities...  
nearly all of the purely  
humans were enjoying the  
elehumans serving as  
transport vehicles in all  
kinds of forms... from  
horses to bikes to carlike  
forms and velocity  
performance perhaps one  
could say that within a  
month after elehumans

starting to serve with their  
bodies as machine  
replacements.... there was  
noone on planet earth who  
was hungry or suffered  
from being without shelter  
with elehumans now in the  
numbers of billions and  
multiplying gaining mass  
consuming ever renweable  
cosmic energies... the old  
concepts of buying things  
scarcity and fight for  
survival lost its existance  
every purely human who  
was still wanting to eat and

live in a house wear  
clothes etc was now  
enjoing elemental human  
assistance with vast flying  
palaces ... where little  
rivers were flowing down  
100 meter high  
minimountains within the  
ship... fruit orchards with  
vegetable mixed culture  
landscapes grains growing  
on stems between the  
vegetables , also  
mushrooms and cannabis  
plants... the temperature  
inside the alive elehuman

flyships could be set as desired by the purely human passenger although the elehumans performed most of the wishes for the purely humans, they would not allow the purely human passengers to think that they would own these creations their ex-fellow human city inhabitants now elehumans have formed their very personal bodymass into so... life for all purely humans changed in contact with the

elehuman machinery...  
there was no more work  
what was expected from  
anyone nor any shortage  
of food or protection  
everyone now could stay  
at a place on earth feeling  
cosy in a 50 diameter big  
flying houseship or fly  
higher with a ship hundred  
times bigger in size

Publication Date: August
